When this unit is destroyed instead of exploding it lands on the closest available spot. It is untargetable for the rest of this round. In the round up phase, the Phoenix takes off again with D3 Damage Points. It can only come back into the game like this once, the second time it crashes and explodes as normal.

Retro Thrusters: When deploying this squad, you may declare that it will deploy via Retro Thrusters. It is placed in Reserve. An Infantry unit may use one action during their activation to call in this squad from In Readiness. Place 1 unit from this squad within 6" one of the Infantry units. Then place any other units from the squad within coherency. All of these units must be placed on Passable terrain, and cannot be placed within 3" of enemy units. The squad is free to activate during their Battlegroup's activation, but any Shooting attacks made by them suffer a +2 penalty to their Accuracy.

Drone Base: At the start of this unit's activation, you may roll 2D3. The resulting number of Starsprite Drones are placed in a squad on the board, following disembarking rules as if this unit were their Transport. The Drone Base can do this each turn, with each new squad of Starsprite Drones operating individually, as part of this unit's Battlegroup. However, no more than 8 Starsprite Drones may be in play at any time for each Ferrum Drone Base on the board. Any extra generated are lost.

Command Centre: This unit may add a Command Centre and therefore house a Commander for an additional 10 points.
